

CSE221: Algorithms

Lab-05

Spring 2026

Assignment-05 Links:

codeforces Invitation Link:

<https://codeforces.com/contestInvitation/abca73425d8db25eca6287df0a6e85d8432f99fe>

Alternative Link:

<https://codeforces.com/contests/678357>

[The alternative link will **only work** after you have successfully registered using the first link.]

Deadline: Apr 19, 2026 2:00 PM

After the deadline ends, you can submit your solution by entering the contest as a Virtual Participant for practice purposes. **However, please note, submissions after the deadline are not accepted for grading.**

Important Notes:

Updated lab plan:

- No CSE221 lab class on Mar 28, 2026, Mar 29, 2026
- Quiz-02 Date: Apr 11, 2026, Apr 12, 2026 (as per your routine)
- Quiz-02 Syllabus: Assignment-03 and Assignment-04
 - One quiz covering both topics
 - Take Preparation for both assignment problems and outside assignment problems

Learning Outcome:

Upon successful completion of this lab, students will have a solid understanding of graph and grid traversal techniques. They will be able to apply fundamental concepts such as graph traversal, cycle detection, shortest path finding, and flood fill in practical problem-solving scenarios. Students will also learn how similar ideas extend to two-dimensional grids, enabling them to identify reachable regions and

solve practical search problems. Overall, this lab aims to help students connect the theory of graph algorithms with their practical use in code, and to develop confidence in choosing and applying appropriate traversal strategies.
