CSE221: Algorithms
Lab-04
Summer 2026

Announcements for Students

You can view your lab marks from lab marks portal. If you find any discrepancies, kindly inform your lab faculties.
Note that if a student is found to be involved in any unfair means, their marks will be changed at ANY TIME as per the lab policy.

No regular Lab Quiz on July 18-19, 2026 (as per your lab class schedule). Lab Content 5 will be covered on that day.

About Quiz 04:

Date: August 15-16, 2026 (as per your lab class schedule)
Syllabus: Lab 04 & 05 content

Take Preparation for both assignment problems and outside assignment problems

Assignment-04 Links:

Codeforces Invitation Link:
https://codeforces.com/contestInvitation/280af10c3aa435b841dbf134ec50d329eb7fe179

Alternative Link: **https://codeforces.com/contests/703421**
[The alternative link will **only work** after you have successfully registered using the first link.]

Deadline: Jul 19, 2026 2:00 PM

Note: Use FAST I/O in your code to avoid Time Limit Exceeded (TLE), especially in the quiz.

After the deadline ends, you can submit your solution by entering the contest as a Virtual Participant for practice purposes. **However, please note, submissions after the deadline are not accepted for grading.**

Please note that your assignment submissions will not be evaluated if they are flagged as AI-generated.

Learning Outcome:

After completing this lab, students will be able to construct graphs using both adjacency list and adjacency matrix representations, differentiate between these forms based on their efficiency and application, and apply suitable data structures to implement and analyze graph-based problems. Students will also be able to interpret problem requirements to design appropriate graph representations and algorithms effectively.
