CSE221: Algorithms
Lab-06
Summer 2026

Announcements for Students

About Quiz 05:

Date: August 22-23, 2026 (as per your lab class schedule)
Syllabus: Lab 06 content

Take Preparation for both assignment problems and outside assignment problems
[Student Drive Folder Link]

Assignment-06 Links:

Codeforces Invitation Link:
https://codeforces.com/contestInvitation/25428caed9340eb3854b5960dd4599722fede07b

Alternative Link: **https://codeforces.com/contests/710626**
[The alternative link will **only work** after you have successfully registered using the first link.]

Deadline: Aug 23, 2026 2:00 PM

Note: Use FAST I/O in your code to avoid Time Limit Exceeded (TLE), especially in the quiz.

After the deadline ends, you can submit your solution by entering the contest as a Virtual Participant for practice purposes. **However, please note, submissions after the deadline are not accepted for grading.**

Please note that your assignment submissions will not be evaluated if they are flagged as AI-generated.

Learning Outcome:

After completing this lab, students will have a better understanding of how to use BFS and DFS to solve more advanced problems. They will learn how to check if a graph is bipartite, how to find a topological order of a graph, and solve other problems that use these techniques. This lab will help students think more clearly about how graphs work and how to turn those ideas into working code.
