CSE221: Algorithms
Lab-07
Summer 2026

Announcements for Students

You can view your lab marks from the lab portal [click here].
If you find any discrepancies, please inform your lab faculties.

Please note that if you are found to be involved in any unfair means, your marks will be changed AT ANY TIME in accordance with the lab policy.

About Quiz 06:

Date: August 29-30, 2026 (as per your lab class schedule)
Syllabus: Lab 07 content

Take Preparation for both assignment problems and outside assignment problems

Assignment-07 Links:

Codeforces Invitation Link:
https://codeforces.com/contestInvitation/eea712f763344761df2aba53f301709c4ad7c025

Alternative Link: **https://codeforces.com/contests/712071**
[The alternative link will **only work** after you have successfully registered using the first link.]

Deadline: Aug 30, 2026 2:00 PM

Note: Use FAST I/O in your code to avoid Time Limit Exceeded (TLE), especially in the quiz.

After the deadline ends, you can submit your solution by entering the contest as a Virtual Participant for practice purposes. **However, please note, submissions after the deadline are not accepted for grading.**

Please note that your assignment submissions will not be evaluated if they are flagged as AI-generated.

Learning Outcome:

After completing this lab assignment, students will be able to use Dijkstra's algorithm to solve and adapt shortest path problems in different situations. They will learn to handle different definitions of path cost and work with extra conditions or constraints, building a stronger understanding of how algorithms can be applied and extended to solve complex problems.
